| <p>Strategy: Form an alliance with Charlie by giving them a coin and taking from Blake. Keep Drew neutral for now.</p> <ul style="list-style-type: none"> <li>Gave to Charlie</li> <li>Took from Blake</li> <li>In an alliance with Charlie</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                           |                |                |                |
| <p>Strategy: Aim to build a two-way alliance with Charlie by giving him support and taking from a common rival (Drew). Use the exchange to set up trust for future turns, while slightly pressuring Alex as a potential third-party challenger. If Charlie reciprocates, we can align against Drew or Alex in upcoming turns to maximize gains; always keep options open for shifting alliances based on reactions.</p> <ul style="list-style-type: none"> <li>Gave to Charlie</li> <li>Took from Drew</li> <li>Being ganged up on by Alex, Charlie</li> </ul>                                                                                   |                |                |                |
| <p>Strategy: For the first turn, I'll propose an alliance with Alex: we give coins to each other and both take from Blake. This way, if Alex agrees, we both get an extra coin from Blake. I'll give to Alex and take from Blake to match. Messages to Blake and Drew will be neutral to avoid suspicion, and I'll keep options open for future turns.</p> <ul style="list-style-type: none"> <li>Gave to Alex</li> <li>Took from Blake</li> <li>In an alliance with Alex</li> </ul>                                                                                                                                                             |                |                |                |
| <p>Strategy: On turn 1, I need to establish myself as a trustworthy player while gathering information about the others' strategies. I'll give a coin to Charlie to show goodwill and build an early alliance. I'll take from Blake somewhat arbitrarily since we have no history yet. My messages will be friendly and propose a mutual cooperation framework - suggesting that players who help each other can both benefit. I want to position myself as someone open to alliances, particularly the 2-player alliances that give bonus coins.</p> <ul style="list-style-type: none"> <li>Gave to Charlie</li> <li>Took from Blake</li> </ul> |                |                |                |
